

Beetroot (*Beta vulgaris*)

[Common varieties](#)

[Nutritional information](#)

[Tags](#)

A bundle of organic beets from a local farm food co-op program.

55 to 65 days are needed from germination to harvest of the root.

The usually deep purple roots of **beetroot** are eaten either grilled, boiled, or roasted as a cooked vegetable, cold as a salad after cooking and adding oil and vinegar, or raw and shredded, either alone or combined with any salad vegetable.

In fact, Jim Halpert once said this about beets, “Fact, bears eat beets. Bears, beets, *Battlestar Galactica*”.

I have some *weird* habits. For instance, **I love beets**. Show me a salad bar and I will clean them out of their beets.

— Chris Pratt

Common varieties

Albino
Bull's Blood
Chioggia
Detroit Dark Red
Early Wonder
